THERE'S A TREASURE IN YOUR BACKYARD

You may not realize it, but your home is sitting on a **free and renewable** supply of energy. A WaterFurnace geothermal comfort system taps into the stored solar energy in your own backyard to provide **savings up to 70% on heating, cooling and hot water**. That's money in the bank and a smart investment in your family's comfort. Contact your local WaterFurnace dealer today to learn how to **tap into your buried treasure**.

OTHER INFORMATION

Date of Incorporation: Sept. 30, 1937
Fiscal year-end: Dec. 31
countrylines.com/coops/ontonagon

Ontonagon County REA is an equal opportunity provider and employer.

A Solid Investment In Your Electric Co-op

Debbie Miles
General Manager

As a member of Ontonagon REA, you make an investment in the co-op every time you pay your bill. This collective investment in the co-op benefits you and the community immediately and over time. So what exactly is this monthly investment, and how do you benefit from it?

The service charge is a monthly investment that helps your co-op cover the expenses of maintaining the overall electric system. The service charge is a monthly fee that is charged to all Ontonagon REA members to help cover the fixed costs of supplying electricity. Poles, wires, crossarms, transformers, hardware, trucks, vehicles, insurance, interest, and taxes are just a few examples of costs that your co-op must pay regardless of how much or how little electricity is used by our members. These costs, which are reasonably predictable, are distributed fairly through a monthly service charge. The service charge essentially ensures that all equipment operates properly and staff is trained and ready, so the lights turn on when you need them.

Regardless of how much electricity a particular family uses, the cost of delivering power to that house is the same. As a not-for-profit electric cooperative, we believe the operational costs should be spread fairly and equitably across all of our members, regardless of the level of electricity use. That is why every member pays the service charge each month to cover basic operational costs. All members are charged the same amount for the cost of operation since all members benefit from the same service. In essence, this gives each co-op member an equal share in Ontonagon REA's operation.

Your monthly investment ensures you have access to safe, reliable and affordable power when you need it. We appreciate and value the investment that you make in the co-op each month, and we strive to use that investment wisely for the benefit of all members of our community. ■

Two District Openings On Co-op Board

The Ontonagon County Rural Electrification Association is comprised of seven districts, with directors elected for three-year terms. This year, terms will expire for directors representing District 3—Ewen/Trout Creek and District 7—Boston/Lake Linden. Incumbents are Tom List and Paul Koski, respectively.

If you are interested in running for these open positions on the board of directors, you must call or stop by the co-op's office to request a nominating petition. A petition must be returned to Ontonagon's office by Monday, May 1. Due to a change in co-op bylaws enacted at the 2002 annual meeting, nominating petitions will no longer be sent to each member residing in these districts.

In order to be valid, a nominating petition requires the signature of five active members of the co-op that receive electric service in that district (husband and wife are considered one member so either may sign, but not both). The member who is being

nominated must also sign the petition. Completed petitions should also include a brief bio and recent photo of the nominee.

Ballots will be mailed to each member of the district 30 days before the annual meeting, which is scheduled for Saturday, June 17. All ballots must be returned to the co-op office no later than noon on Monday, June 12. Ballots will be counted, and results shared at the annual meeting. ■

Attend Your Co-op's Annual Meeting Save The Date — June 17!

The board of directors and employees of your electric co-op invite you to join them at the 2017 Annual Meeting on June 17 at Chassell High School. This is a chance to visit with your neighbors and friends from throughout our five-county service area and participate in your co-op's affairs. You will hear about the state of the co-op over the past year, as well as our vision for the future. At the meeting, newly elected directors from District 3—Ewen/Trout Creek and District 7—Boston/Lake Linden will be seated.

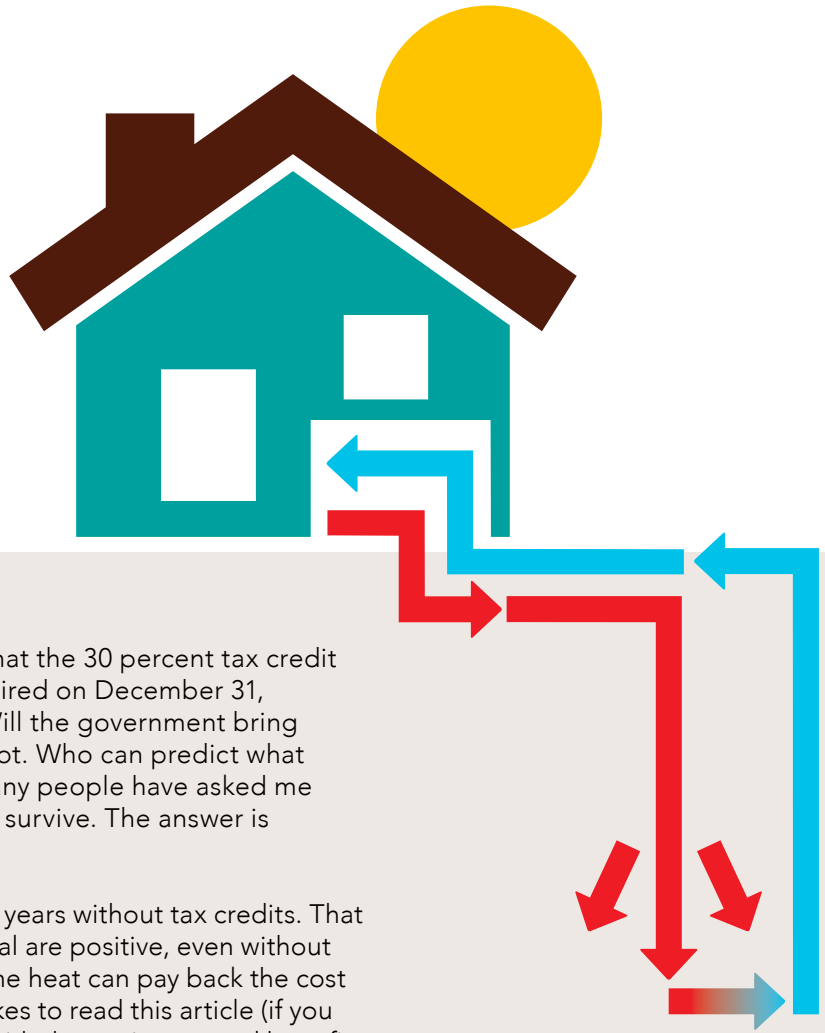

Meeting Highlights:

- 10 a.m., Chassell High School
- Updates on co-op affairs by co-op president and general manager
- Director election results
- Update on your co-op's financial health
- Drawing for cash prizes
- Continental breakfast and lunch will be served

Geothermal Systems

The rumors of their demise are greatly exaggerated.

By Larry Kaufman

Many of you have heard or read that the 30 percent tax credit for geothermal heat pumps expired on December 31, 2016. That is completely true. Will the government bring the tax credits back? Maybe...maybe not. Who can predict what the government will do? A question many people have asked me is whether the geothermal industry will survive. The answer is absolutely, positively, undeniably, YES!

The geothermal industry survived many years without tax credits. That is because the economics for geothermal are positive, even without the tax credit. Anyone with oil or propane heat can pay back the cost of a geothermal system in the time it takes to read this article (if you are a very slow reader). When coupled with the environmental benefits, comfort benefits, and that there is no outdoor unit—geothermal makes sense.

For 20 years I have had geothermal at my house. People tell me that they won't spend the extra money for geothermal. However, you are going to spend it—either on geothermal or by paying the utility. If you spend it on geothermal, you keep this extra money. Otherwise, you continue to pay this extra money forever. It's your choice.

The Michigan Geothermal Energy Association's annual conference is April 27 from 8 a.m. to 1 p.m. at Soaring Eagle Casino in Mt. Pleasant. This is a great place to learn more about geothermal. The fee is \$20 at the door or free if you request a quote on geothermal from any dealer at the conference. ■

Larry Kaufman is the Executive Director for the Michigan Geothermal Energy Association.

Visit earthcomfort.com or geoexchange.org to learn more about geothermal.

Michigan Legislature Approves Energy Package

Craig Borr, CEO
Michigan Electric
Cooperative
Association

After nearly two years of discussion, dialogue, committee hearings and, at times, frustration, the Michigan Legislature passed an energy reform package as their last initiative prior to recess in late December. The two-bill package is 200-plus pages in length and is the first major piece of state energy legislation since 2008.

One of the principal goals of the legislative package was ensuring additional “marketplace certainty” so that additional generating capacity can be constructed in our state. Michigan’s generating capacity, particularly in the Lower Peninsula, has been declining significantly over the past few years due to the many plant retirements necessitated by new, more stringent federal environmental standards.

Thankfully, electric cooperatives in Michigan are in a much better position than many of their neighboring municipal and investor-owned utilities when it comes to generating capacity and the ability to meet member demands during peak load periods. The 430-megawatt Alpine Generating Plant built by Wolverine Power Cooperative near Gaylord last year is a prime example of how Michigan’s electric co-ops are preparing for their members’ future needs. The Alpine plant required an investment of nearly \$200 million and is fueled by natural gas.

What are some of the specifics included in the energy legislation signed by Michigan Governor Rick Snyder in December, and how will they impact you and your electric cooperative?

- **Renewable Energy** – The new energy legislation increases the state’s Renewable Portfolio Standard (RPS) from the current 10 percent level to 15 percent in 2021. The majority of Michigan’s electric cooperatives already exceed the 15 percent renewable energy threshold required in 2021 from their extensive use of solar, wind and hydroelectric generating resources located in Michigan. Electric co-ops are Michigan’s renewable energy leaders.
- **Net Metering** – As member regulated utilities, Michigan’s electric cooperatives will continue

to set the parameters of their own net metering programs so that member-consumers can access their electric co-op’s net metering programs without regulatory involvement.

- **Electric Choice** – Like the state’s largest electric utilities, electric cooperatives will continue to offer “choice” to their large commercial and industrial members through Michigan’s electric customer choice program. However, electric choice suppliers will need to prove they have ample supplies of electric capacity to meet the energy requirements of “choice” customers. This is particularly important as much of Michigan’s electric generation fueled by coal continues to dwindle due to age and federal environmental requirements.
- **Energy Optimization** – Electric co-ops will continue to provide their members with energy optimization programs designed to reduce electric usage through LED lighting, installation of energy-efficient appliances and more extensive efficiency programs for commercial, industrial and agricultural members.

Michigan’s electric cooperatives were supportive of the new energy legislation and believe strongly that it will be good for our member-consumers throughout rural Michigan. We are hopeful that this package will result in the construction of new and cleaner forms of electric generation in Michigan, including new natural gas, wind and solar facilities. ■

Recycle And Save!

Do you have an old refrigerator or chest freezer taking up valuable space in your basement or garage? While you may not think about these appliances often, they could be adding hundreds of dollars onto your utility bill each year.

Declutter your home and save money with our Energy Optimization program. You can earn \$50 for removing and recycling a secondary refrigerator or freezer!*

Free appliance pick up made easy:

The Energy Optimization team will pick up and recycle your old refrigerator(s) or freezer(s) for FREE. You can choose to send along an old window air conditioner or dehumidifier for recycling as well. NOTE: All items must be in working condition.

How to participate:

Contact the Energy Optimization team at 877-296-4319 to schedule an appointment. A representative from our team will come to your home for the pick up, and a cash incentive will be mailed to you. It's that simple!

Cash incentives are available for the following:

Appliance Type	Pick up or Ride-Along Item	Incentive Amount
Refrigerator	Pick up	\$50
Chest Freezer	Pick up	\$50
Window Air Conditioner	Ride-Along	\$15
Dehumidifier	Ride-Along	\$15

**Limit two appliances per year, per residence.*

More ways to save!

Are you working on a remodeling project? Your electric utility's Energy Optimization program offers cash incentives for qualifying ENERGY STAR® appliances, including refrigerators, washers and dryers, ceiling fans, room air conditioners, televisions, and more.

Please visit michigan-energy.org for more information, or call **877-296-4319** with any questions. ■

Ready to upgrade or get rid of an old refrigerator or freezer?

Recycle it and save! Earn cash incentives for recycling your old, functioning appliances.

- **Refrigerator = \$50**
- **Freezer = \$50**
- **Dehumidifier** (ride along item) = **\$15**
- **Window Air Conditioner** (ride along item) = **\$15**

Contact the Energy Optimization team to schedule a free pick up.

Shopping for new appliances?

Energy Optimization offers cash incentives for qualifying ENERGY STAR® appliances. Visit our website for a complete list of savings opportunities.

ONLINE: michigan-energy.org

PHONE: 877-296-4319

Energy Optimization programs and incentives are applicable to Michigan electric service locations only. Other restrictions may apply. For a complete list of participating utilities, visit michigan-energy.org.

Sharing Family Photos

Aaaah, life is good! Pups are resting after playing with their mom. By Mary Kaminski

Submit A Photo & Win A Bill Credit!

Ontonagon REA members whose photos we print in *Michigan Country Lines* will be entered in a drawing. One lucky member will win a credit up to \$200 on their December 2017 energy bill!

Upcoming topics and deadlines are: **Planes, Trains and Automobiles** due **March 20** for the May issue, **The Art of Nature** due **May 20** for the July/August issue and **Birds and Feathers** due **July 20** for the Sept. issue.

To submit photos, and for details and instructions, go to <http://bit.ly/countrylines>

We look forward to seeing your best photos!

My grandson playing in the snow! By Donna Kotaniemi

The three fuzziest, cuddliest members of my family!
By Nathan Miller

SOUPS & STEWS

Warm up with these hearty, comforting recipes.

Larry's Mushroom Soup

Larry Rospierski, Great Lakes Energy

- 1½ pounds mushrooms (larger ones are easier to clean and slice)
- ¼ cup butter
- ½ teaspoon salt
- 1 medium sweet onion
- 2 medium cloves garlic, minced
- 3 teaspoons flour
- 1 cup half & half
- 1 quart chicken stock
- 1 cup plain Greek yogurt
- 1 tablespoon white cooking wine
- pepper, to taste
- 4–5 large leaves fresh basil, shredded or finely cut
- ½ cup chopped scallions or chives (fresh is best)

Begin by wiping clean (do not wash) the mushrooms and slicing thin (⅛" or so). Melt butter in a large stockpot and cook mushrooms covered for about 5 minutes on low heat. While mushrooms are cooking, dice the onions. Add salt to the stockpot and stir. Then reserve about ¼ of the mushrooms on the side. Add the onions and garlic. Cover and cook for another 5 minutes. Add the flour and mix well. Remove the pot from the heat. After the mixture is completed, add the half & half slowly and whisk on low heat. Add the stock slowly, whisking on low heat. Then add the yogurt, whisking on low heat. Add the basil, stirring (not whisking) in well. Then add the wine and stir in. Using an immersion blender (or mixer), combine and chop all ingredients thoroughly. The texture will not be smooth. Add most of the mushrooms that were set aside, saving about 2–3 slices for each serving. Cover and continue cooking slowly, bringing the soup to just below boiling. Serve with two or three of the sliced mushrooms in the middle and pepper to taste. Garnish with scallions or chives.

Minestrone

Carolyn Davis, Midwest Energy

- 2 tablespoons butter
- 1 pound stew meat, cubed (can substitute with browned turkey or Italian sausage)
- 7 cups beef broth or beef stock
- 2 (15-ounce) cans tomato sauce
- 1 (14-ounce) can diced tomatoes
- ½ cup onion, chopped
- ½ cup celery, chopped
- 2 tablespoons dried parsley flakes
- ½ teaspoon salt
- ½ teaspoon thyme
- ¼ teaspoon pepper
- 2 cups shredded cabbage
- 1 cup zucchini, thinly sliced
- 1 cup carrots, thinly sliced
- 1 (15-ounce) can garbanzo beans, drained
- 1 cup macaroni, uncooked
- 3–4 tablespoons grated Parmesan cheese

In a 6–8 quart Dutch oven, melt butter over medium heat. Add stew meat and cook until browned. Stir in broth, tomato sauce, diced tomatoes, onion, celery, and seasonings. Bring to a boil then reduce heat to low.

Cover and simmer for 1 to 1¼ hours or until beef is tender, stirring occasionally. Add cabbage, zucchini, carrots, garbanzo beans and macaroni. Return soup to boil. Reduce heat to low. Cover and simmer for 20–25 minutes or until the vegetables are tender, stirring occasionally. Ladle soup into bowls and top with Parmesan cheese. Serve immediately.

Up North Venison Stew

Deb Finedell, Great Lakes Energy

- 2 pounds venison, cubed
- ¼ cup butter
- 2 cups sliced celery
- 1 large onion, chopped
- 1 medium green pepper, chopped
- 2 tomatoes, cut up
- 3 medium potatoes, cut up
- ¼ teaspoon Italian seasoning
- 3 tablespoons brown sugar
- 1 teaspoon white vinegar
- 3 beef bouillon cubes
- 10 ounces spaghetti sauce
- 2 cups water
- 2 tablespoons chopped parsley

Brown venison in butter (Dutch oven or large pot) over medium heat. Add remaining ingredients, mix, cover and simmer on low heat for 2–3 hours. Enjoy hot!

Submit your favorite recipe for a chance to win a \$50 bill credit and have your recipe featured in *Country Lines*:

- “On The Grill” due April 4
- “Chicken Challenge” due May 4

Go to micoopkitchen.com for more information and to register.

Olie Bollen (Dutch Fritters, pictured above)

Dr. Jan and Diane Pol

This Dutch pastry is similar to a doughnut-style fritter. A reminder from his childhood in the Netherlands, Dr. Pol says that big celebrations, especially on New Year’s Eve, were never complete without this delicious treat.

- 1 package active dry yeast
- 1 teaspoon sugar
- ¾ cup warm water
- 3 eggs, beaten
- 2 cups milk
- 3 tablespoons light corn syrup
- 1 (1 pound) package raisins
- 4 cups flour
- 1 tablespoon salt
- 1 quart vegetable oil for frying

Dissolve yeast and sugar in water; let stand in a warm place for 30 minutes. Combine eggs, milk, corn syrup, raisins, and yeast mixture in a large pot. Sift flour and salt into the mixture and mix well for 2 to 3 minutes. Test a spoonful of dough to see if it will fall in a lump from the spoon. If not, add a little more water or milk. Let rise in warm place for 2 hours. Heat the oil for frying to 350 degrees in a heavy bottomed, deep skillet. Drop by tablespoon into the preheated oil; fry the fritters until golden brown, about 2 minutes per side. Remove them to a paper towel-lined plate and repeat with remaining dough. Dust with sugar while warm.

Read the full story about Dr. Pol, Michigan’s TV reality star, on page 14 and visit micoopkitchen.com for this recipe and others.

Country Lines, Your Communications Partner

For more than 35 years, our co-op members have received *Michigan Country Lines* because it is the most effective and economical way to share information with our members. An empowering communication tool to keep members up-to-date about everything going on within their electric co-op. Issues contain news about our services, director elections, member

meetings and management decisions members need to know about as owners of the co-op. The magazine also includes legal notices that would otherwise have to be placed in local media at a substantial cost. And, sending *Michigan Country Lines* to you helps the co-op fulfill one of its important principles—to educate and communicate openly with its members. The board of directors authorizes the co-op to subscribe to *Michigan Country Lines* on behalf of each member at an average cost of \$4.01 per year, paid as part of members' electric bill. The current magazine cost is 49 cents per copy. *Michigan Country Lines* is published for us, at cost, by the Michigan Electric Cooperative Association in Lansing. As always, we welcome and value your comments.

Statement of Non-Discrimination

In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Persons with disabilities who require alternative means of communication for program information (e.g., Braille, large print, audiotape, American Sign Language, etc.) should contact the responsible agency or USDA's TARGET Center at (202) 720-2600 (voice and TTY) or contact USDA through the Federal Relay Service at (800) 877-8339. Additionally, program information may be made available in languages other than English.

To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD-3027, found online at http://www.ascr.usda.gov/complaint_filing_cust.html and at any USDA office or write a letter addressed to USDA and provide in the letter all of the information requested in the form. To request a copy of the complaint form, call (866) 632-9992. Submit your completed form or letter to USDA by:

(1) mail: U.S. Department of Agriculture
Office of the Assistant Secretary for Civil Rights
1400 Independence Avenue, SW
Washington, D.C. 20250-9410;

(2) fax: (202) 690-7442; or

(3) email: program.intake@usda.gov.

This institution is an equal opportunity provider.

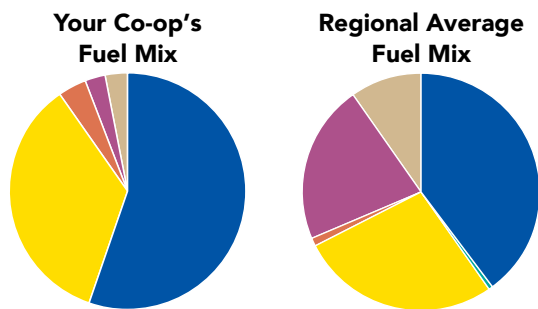

Fuel Mix Report

The fuel mix characteristics of Ontonagon REA as required by Public Act 141 of 2000 for the 12-month period ending 12/31/16.

COMPARISON OF FUEL SOURCES USED

Regional average fuel mix used		Your co-op's fuel mix	
FUEL SOURCE			
Coal	52.8%	47.7%	
Oil	0.0%	0.6%	
Gas	37.1%	18.1%	
Hydroelectric	4.4%	0.8%	
Nuclear	2.8%	26.7%	
Renewable Fuels	2.9%	6.1%	
Biofuel	0.0%	0.8%	
Biomass	0.0%	0.5%	
Solar	0.0%	0.1%	
Solid Waste Incineration	0.0%	0.1%	
Wind	2.9%	4.1%	
Wood	0.0%	0.5%	

NOTE: Biomass above excludes wood; solid waste incineration includes landfill gas.

EMISSIONS AND WASTE COMPARISON

TYPE OF EMISSION/WASTE	lbs/MWh	
	Your Co-op	Regional Average*
Sulfur Dioxide	0.7	7.6
Carbon Dioxide	1,448	2,170
Oxides of Nitrogen	0.6	2.0
High-level Nuclear Waste	0.0000	0.0083

*Regional average information was obtained from MPSC website and is for the 12-month period ending 12/31/16.

Figures for Ontonagon County REA are based on those of its principle power suppliers, Wisconsin Public Service and WE Energies.

Thank A Lineworker On April 10

As the “first responders” of the electric co-op family, lineworkers perform around-the-clock duties in dangerous conditions and challenging situations to keep power flowing and protect the public’s safety. These brave members of our community go above and beyond to restore power to their neighborhoods and towns often in the most hazardous environment. That’s why electric co-ops have designated a National Lineman Appreciation Day. This year, April 10 is the day we honor the hard-working men and women who keep the lights on.

Resolutions adopted by the National Rural Electric Cooperative Association (NRECA) explain it best: “Whereas linemen leave their families and put their lives on the line every day to keep the power on; Whereas linemen work 365 days a year under dangerous conditions to build, maintain and repair the electric infrastructure; Whereas there would be no electric co-ops without the brave men and women who comprise our corps of lineworkers.” Lineworkers everywhere deserve this special day of recognition.

These highly-skilled men and women light our homes and businesses every day. They endure harsh weather and long hours, all to make our lives more comfortable. On April 10 (and every day), please take a moment to thank them. Lineworkers are the heart of the co-op nation, proud and strong.

Use #thankalineman to show your support for the men and women who light our lives. ■

Plant A Tree In The Right Place

Earth Day is April 22. Show the earth some love, and plant a tree. Choose the right tree for the right place and avoid future problems with power lines.

To avoid future electrical hazards, planting tips include:

- Consider the mature height of trees. Any tree that can grow as tall as 25 feet or more should not be planted near overhead power lines. A mature height of less than 15 feet is recommended.
- Do not plant near underground utility services. Tree roots can grow and interfere with underground pipes, cables and wires. Future repairs to these facilities could also damage the health and beauty of nearby plants and trees.
- Keep areas around electric meters, transformers or other electrical equipment free of any vegetation that could limit utility service access.

- Before digging, call 811, the local underground utility locator service, so that accidental contact, damage and injuries can be avoided. ■

Tree Planting Guide

DR. POL

AMERICA'S FAVORITE TV
VETERINARIAN & LOCAL LEGEND

Renewable Energy

Dr. Pol, his wife, Diane, and their team care for countless animals, but they also care about renewable energy. The Pols have a long history with renewable energy, installing solar panels on their farm as early as the 1970s.

"I grew up in the Netherlands," said Dr. Pol. "With the windmills all around, renewable energy has always been a part of my life."

The Pols have invested in two additional solar projects, including their most recent which included installing approximately 5,000 square feet of high-efficiency monocrystalline panels to the barn on their property. They worked closely with their local co-op, HomeWorks Tri-County Electric, as well as Ecojiva and CNR Electric.

The system is equipped to generate up to 57 kW. By incorporating solar panels on their property, the Pols hope to take full advantage of the renewable energy generated in order to offset their residential usage. The Pols plan to sell their excess energy back to the utility for the benefit of their fellow co-op members.

"It's great watching how much energy is being generated, just since October," noted Dr. Pol. "Even on overcast days power gets generated. I'm looking forward to watching the meter this summer!"

By Emily Haines Lloyd

Don't let his frank demeanor fool you. Dr. Jan Pol, also known as *The Incredible Dr. Pol* on National Geographic's WILD channel, is all heart.

Even his journey from his native country, the Netherlands, to rural Michigan was an act of love. Pol was an exchange student, staying with a family in Mayville, Mich. That's where he met his future wife, Diane. After he returned to the Netherlands, Diane traveled to Europe where they eventually fell in love.

Growing up on a dairy farm in the Netherlands, Dr. Pol's love of animals led him to veterinary school. After graduation, the Pols were married, and Dr. Pol joined a veterinary practice in Harbor Beach, Mich. "It was a great place to start," said Dr. Pol. "But I also knew I wanted to start my own practice one day."

After 10 years in Harbor Beach, the Pols sought out a more centrally-located area to open their practice. They settled on Isabella County, in the

Check out Dr. Pol's book, *Never Turn Your Back on an Angus Cow*, which is full of amusing and poignant tales from his four decades as a vet in rural Michigan.

heart of Michigan. It was there that the Pols built their practice and their lives.

The life of a country vet is anything but redundant. Dr. Pol has treated everything from large farm animals to beloved family pets. "I've castrated 16 different species of animals," he jokes with a laugh.

It's these offhanded, hilarious and all-too-true comments that likely landed Dr. Pol his own television show. When his son, Charles, now a producer on the show, pitched the idea to some friends in the television business, he described his father as "a real character."

"I'm just a stubborn Dutch boy," said Dr. Pol. "I go around, do my work, and the camera follows. I think people are looking for reality TV that is real."

People certainly are—*The Incredible Dr. Pol* had more than 1 million viewers for its Season 7 premier, making it National Geographic WILD's most-watched telecast in its network history.

Even with his recognizable face, Dr. Pol still sees himself as the local vet.

"I love what I do. I try to help animals the best I can and make their owners happy," he said. "I'd love to see every kid grow up with animals. Kids who are taught to treat animals well become compassionate adults."

Compassion is the hallmark of Dr. Pol's practice and his life—a life that is full of love, adventure and all things incredible. ●

The Pols are members of HomeWorks Tri-Country Electric Cooperative.

If you pay your bill through a third-party online payment site (i.e. doxo.com), you may be subject to hidden fees and processing delays.

Beware Of Online Payment Sites

Paying your Ontonagon REA electric bill can be fast, easy and free when you use our website or any of our other approved payment methods. But, BEWARE! If you choose to use another payment website, you risk extra charges and payment processing delays that could result in late fees. To avoid these extra fees, make sure to use Ontonagon's website to make a payment. You can tell by looking in the address bar at the top of your screen. It should begin with www.ontonagon.coop or <https://ontonagon.smarthub.coop>.

Even if a website has Ontonagon's name and company logo appearing on the site, you must check the website's address. Some third party payment websites can cost you money. Using third party websites to pay your electric bill may result in:

- Extra charges from the third party for each transaction on their website.
- Delays of up to 10 business days or more between the time you make the payment and the time it is submitted to Ontonagon and posted to your account.
- Disconnection if payment is not received in time.

Even if a late payment does not result in a shutoff, late payment fees could be charged to your account. You can avoid all this by taking advantage of the

payment options offered directly by Ontonagon, which includes several free and convenient payment methods. Choose whatever option works best for you:

- **AutoPay:** Your payment is automatically deducted each month from either your checking or savings account, credit card or debit card.
- **SmartHub:** Pay with the app or online at ontonagon.coop. Make a payment from your checking or savings account, or credit card or debit card.
- **U.S. Mail:** Send your payment in the return envelope included with your bill; or send to Ontonagon REA—500 J.K. Paul Street—Ontonagon, MI 49953
- **Pay by Phone:** We accept payment by credit card or checking or savings over the phone. Simply dial 906-884-4151 during business hours. We accept payment by credit card or checking or savings over the phone
- **In Person:** Drop your payment off at the Ontonagon business office or in the after-hours drop box.

Our goal is to make paying your electric bill convenient, safe and without additional cost or risk. If you'd like more information about any of these payment options, or to set up auto pay from one of your accounts, please call our office at 906-884-4151. ■

Digital Devices Impact Energy Use

Ah, the Digital Age. We have gadgets galore, the ability to manage our homes in new and innovative ways, brilliant images, captivating sounds of modern entertainment and, of course, the internet. These new digital capabilities come with a couple of pitfalls, phantom energy use and the issue of “technology reincarnation.”

Major appliances aside, most digital devices do not use 120-volt power, the standard voltage of a home outlet. They use much less. So, trying to plug your brand-new smartphone directly into an outlet is going to lead to a fried device. Therefore, low-voltage devices come with a power adapter. These “wall warts” as some term them, take the 120-volt electricity supplied by Ontonagon REA and convert it to, say, five volts. However, most folks leave their adapters plugged in to make recharging easier. The problem with this approach is that the adapter uses power even when it isn’t charging a device.

This invisible energy consumption is often called “phantom energy use.” The only way to stop this is to unplug the power adapter when it is not in use or use smart power strips. These look like the typical power strip, but only one socket gets power all the time. When the device or appliance connected to it turns on and starts using power, the remaining sockets receive power too. This is ideal for entertainment systems, computers and other situations.

The second issue, technology reincarnation, occurs when consumers replace a product at the end of its life. In spite of buying an oftentimes bigger, new product to replace the old one, the tendency is to continue to use the old technology as well as the new.

For example, flat screen television prices have plunged as technology has evolved—and so has the amount of electricity they use. What you used to pay for the 32" model now might net you a 50" giant. But with the bigger TV, you won’t benefit from the increased energy efficiency of the newer technology. The bigger model uses as much juice as the older, smaller TV, which likely ends up in another room (reincarnated in another setting) still using power.

Here are some pointers to help you avoid—or at least reduce—the effects of phantom use and technology reincarnation. Invest in smart power strips or make a point to use outlets where you can conveniently unplug power adapters when not in use. Don’t oversize your replacement appliances and entertainment gear unless necessary. And, recycle the replaced appliances and equipment to stem technology reincarnation. You will enjoy the digital age for a lot less. ■

I Remember...

Thinking back to my fondest Michigan memories, some of them came during the darkest days of my life.

I am not only a member of Presque Isle Electric & Gas Co-op, but also an employee for the past 25 years. To me, it is much more than just a place to work; it is like family. We sometimes disagree and squabble—just like family. We tend to get on each other's nerves—just like family. And then we come together when a brother or sister is in need—much like family. When tragedy strikes, we come together in many ways. Whether it be in one another's offices to talk, at a funeral, or as a group meeting with counselors on hand.

I felt like part of the PIE&G family in 2000 when I lost my 2 ½-year-old son, Jordan, suddenly after a very short illness. My co-op family rallied together for my family. They literally delivered a truck load of food to my house. I only remember the pan of chocolate covered cookie bars that I hid in my walk-in closet under a stack of clothes. (Yes, I ate the entire pan of cookies myself.) At the funeral, bucket trucks lined up in front of the church. It was a breathtaking sight for my family. They still talk about it today. As a result of my son's death, I heard positive stories of marriages reconciling, family feuds being settled, and an attitude among many friends and family that life is just too short to not live in harmony with others.

When I returned to work, my PIE&G family was there for me and ready to listen at any moment I needed. And, exactly one year later, my family was able to meet a very sweet little girl that received my son's liver. These were truly some of my fondest memories.

Heather Homan
Presque Isle Electric & Gas Co-op

We invite members to share their fondest memories.

Country Lines will pay \$50 for stories we publish.

Guidelines

1. Approximately 200 words
2. Digital photos must be at least 600 KB
3. Only one entry per household, per month
4. *Country Lines* retains reprint rights
5. Please include your name, address, email, phone number and the name of your electric co-op
6. Submit your memories online: countrylines.com

«« Where In Michigan Is This?

Identify the correct location of the photo on the left by April 10 and be entered into a drawing to win a \$50 electric bill credit. Enter your guess at countrylines.com or send by mail to: *Country Lines* Mystery Photo, 201 Townsend St., Suite 900, Lansing, MI 48933. Include the name on your account, address, phone number, and the name of your co-op.

Our Mystery Photo Contest winner from the January 2017 issue is James Pelkey, a Thumb Electric member who correctly identified the photo as the Emergency Ark (Boat Barn) near Caseville on Oak Beach Road.

Winners are announced in the following issues of *Country Lines*: January, March, May, July/August, September and November/December.
